

Church Planter Starter Kit

You're called to plant. We're called to help.

Mac Hard Drive Mini-Kit

Use these apps and articles to tackle your Mac's hard drive space woes. *If you are a Windows user, you can find the same kinds of articles or similar apps with a simple Google search.*

Favorite HD Cleaning App

[Clean My Mac](#) will take care of your hard drive like none other. I use this app to clear space on my HD all the time. In addition to cleaning regular files, the app has a number of helpful categories to help you find and remove unwanted files (System junk, Photo junk, iTunes junk, etc).

Get a snapshot of what's eating up your HD in 2 clicks

Get a visual picture of what's going on with your HD space by clicking on your  (Apple) icon in upper LH corner and choosing **About This Mac**. Then click **Storage** and you'll see...

Apps that find large files on your HD

Head to the app store and search for one these to help you locate large files on your HD.

- ▶ Clean My Mac (use the 'Large & Old Files' feature)
- ▶ Space Gremlin
- ▶ Duplicate Detective

How to search your HD for certain file types

- ▶ [How to Search for file types on a Mac](#)
- ▶ [How to Search for file types on Windows](#) (in case you are a Windows user who accidentally downloaded this free mini-kit)

You're called to plant. We're called to help.

Use Finder to locate common file types of large files (video, audio)

[See #2 in this article](#) and learn how to effortlessly track down video, audio and pictures on your HD by file type. Then search for these “kinds” of files. (NOTE: Make sure you choose “This Mac” in the Finder window to the left of the search so that your search is NOT limited to your current folder).

- ▶ Type **movie** in the Finder search bar and choose “Movies” under the “Kinds” popup. This will show you every movie file on your HD.

- ▶ Type **audio** in the Finder search bar and choose “Audio” under the “Kinds” popup. This will show you every movie file on your HD.

Great How-To Articles

- ▶ [The Mac “Startup Disk Almost Full” Message and How to Fix It](#) (even if your HD is not full, this article will quickly show you how to make some more room).
- ▶ [Clean up and organize your iTunes music library](#)
- ▶ [How-to: Use Spotlight and Smart Folders to search for anything on your Mac](#) (good for those running a slightly older version of a Mac OS)

App to organize iTunes

If your iTunes library is a mess, [Song Sergeant](#) can make clean up a breeze.
