

Church Planter Starter Kit

You're called to plant. We're called to help.

My 7 Most-Used Free Apps for Mac

I use these free Apps daily. Try them out to increase your productivity.

Memory Clean

The #1 Rated Memory Cleaning Utility for the Mac. [Grab free this app](#) and use it to free up your RAM. I use it often to clean up memory that my browser hogs up while surfing the endless web.

Alfred

[An award-winning app for efficiency](#). I use the hotkeys to launch apps, empty my trash, eject my external HD and open files. There is a paid Powerpack option, but I stick with the free version.

MindNode Lite

I love a good mind map. [MindNode Lite](#) does just enough for me. As thoughts bubble out, I capture and organize them here. I use it to plan every Church Planter Starter Kit module.

Writed

I've been writing more as of late. I always start with this [distraction-free, stripped down writing app](#). Formatting is limited (on purpose) using easy-to-learn [markdown](#), so I get more done for \$0.

Screen Record Lite

Sometimes you need [a down and dirty screen recording app](#) to quickly show volunteers how to do a task on the computer. For short demonstrations, I've used this handy free app to do the trick.

Bowtie

I jam to tunes on the free Spotify. I use [this nifty app](#) to control Spotify (or iTunes) with keyboard shortcuts. Without stopping what I'm doing, I can start/stop/forward/rewind with a keystroke.

Dropbox

[Get your FREE 2GB account](#). I put every important file inside Dropbox, organized in folders. I can then easily share files with friends, co-workers, church leaders, volunteers, etc.
